

CASE STUDY

URGENT CAPITAL SUPPORT

MULTI-ACADEMY TRUST CLIENT

“ THE TRUST AND THE EFFECTED
SCHOOL **ARE VERY GRATEFUL** FOR TIM. ”

- CHRIS HILL CEO

WARNEFORD CONSULTING, URGENT CAPITAL SUPPORT

Acting on behalf of an existing Multi Academy Trust client, Warneford Consulting was instructed to prepare, submit and deliver an Urgent Capital Support (UCS) funded project.

In the week before Christmas, 2022, the school discovered a serious compliance issue with their mains gas supply, resulting in immediate disconnection of the gas and total reliance on their electricity supply.

The school's existing electrical infrastructure had insufficient capacity to cope with the demand placed upon it in lieu of the absent gas supply. The school was subject to regular circuit overload - resulting in their system tripping out.

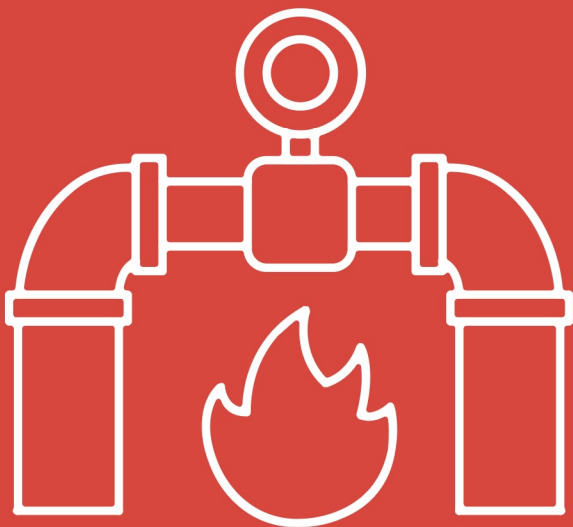

The school's ability to deliver its core curriculum was undermined with science laboratories affected by redundant bunsen burners and cooking classes without gas cooking facilities.

The impact on school buildings being without heating and hot water, left the school vulnerable to a number of health and safety issues for both staff and pupils.

“The trust and particularly, the effected school are very grateful for Tim and his supply chain partners for their advice and efficiency in assisting us.”

- Chris Hill CEO

WORK UNDERTAKEN

Warneford Consulting and the trust collaborated to gather evidence of the failed gas mains supply and of the impact its disrupted service had on the school's ability to carry out its day-to-day operations.

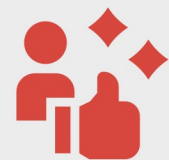

Drawing from their pre-qualified, accredited, and sector-experienced supply chain, Warneford was able to mobilise specialist consultants to prepare a scope of works and specification which then underwrote the tender documents for contractors to bid for.

THE RESULTS

The UCS submission was compiled in conjunction with the trust, and the application submitted. The DfE evaluated the bid, and the project was awarded in a matter of weeks.

Works were phased and programmed around the school's exam period which allowed for incremental reinstatement of the gas supply to individual school blocks.

“[Tim helped] prepare, submit and deliver the essential works that reinstated our gas mains supply.”
